Learning to manage change: Developing regional communities for a local–global millennium

Ian Falk (ed.)

The theme of Learning to manage change: Developing regional communities for a local–global millennium is that Australia should become a learning society in order to build capacity and manage regional change for social and economic benefit for all. Learning is viewed as the integration of formal, non-formal and informal education and training. Dynamic and purposeful learning produces social capital, and social capital produces economic as well as social and personal benefits. Learning is a process of adapting to change while retaining the power to sort and sift the available information so as to meaningfully control our lives in the learning communities in which we live. Learning communities—groups of people who work in dynamic partnership to decide on and manage their futures—are those that will survive as vibrant and productive leaders.

The contributing authors share the roles of providing leading-edge information, analysis of issues and hundreds of best practice examples of building strong communities through active and critical learning.

Six of the contributors are experts from the USA and Canada: Professor Richard Bawden (formerly Australia, now USA), Professor Rusty Brooks (USA), Mr David Bruce (Canada), Professor Norton Grubb (USA), Professor Bernie Moore (USA), Professor Douglas Perkins (USA).

The remaining contributors are from all parts of Australia. The contributions expose and explore some of the significant issues and practical solutions for developing complex communities under contemporary forces for change. There are particular and significant implications for an integrated approach to education and training at the regional level.

‘The chapters provide a rich and provocative blend of information, practical wisdom and issues-based discussions that reflect the variation and complexity of managing change in rural communities of the new millennium.’ Professor John Allen Center for Rural Community Revitalization and Development, University of Nebraska Lincoln, NE USA.
Foreword

*Learning to manage change: Developing regional communities for a local–global millennium* is a book that illustrates the benefits of integrating different approaches to community and regional development for rural Australia. The intention is to illustrate the theoretical, practical and strategic backdrop to community and regional change. The key theme is the value of lifelong learning to community capacity building, where learning is taken as the integration of formal, non-formal and informal education and training at all levels.

The importance for rural development and sustainability in the socioeconomic context of rural decline is a contentious issue. Some argue that decline is the inevitable result of the playing out of market forces. Others, including those represented in this book, take a different view. The view is that something can—and should—be done, and that working towards a lifelong learning society is our best chance of achieving a vibrant and sustainable rural Australia. In order to achieve these goals, fundamental concerns related to re-building social trust and social capital must be addressed as a matter of urgency.

The book avoids a rhetorical exhortation to action, but instead sets out the rationale for a constructive approach to developing communities and regions using an integrated and cross-sectoral approach. From the theoretical underpinnings established early in the book, the issue of the participation of specific sectors in these processes is described. Then there is a section where practical and proven strategies, cases and examples are described from different sectors and perspectives. In all, what I hope is that the book will provide the start of a reasoned, constructive way forward for regional and community development through learning.

*Learning to manage change: Developing regional communities for a local–global millennium* has four parts, and 24 chapters overall. In these chapters, there is a richness of issues, background information and practical strategies related to rural communities and their development in the 21st century. The world in which rural communities are located is characterised by a nexus between a concern and valuing of local communities, and the pressure cooker forces for change and responsiveness imposed by an instantly communicating global economy.

## Contents

**PART ONE   Local-global context**

1. Challenges facing rural regional Australia in new times  
   *Falk*  
   3

2. Regional economic decay and regeneration under structural change  
   *Courvisanos*  
   13

3. Life beyond economics: Learning systems and social capital  
   *Bawden*  
   23

4. Sustainability for regional development: Integrating the models  
   *Geno*  
   31

5. Community psychology, planning and learning: An applied social ecology approach to sustainable development  
   *Perkins*  
   39

**PART TWO   Issues related to learning for change**

6. Education as economic and individual development: Toward education through occupations  
   *Grubb*  
   49

7. Youth and unemployment: Educational pathways or tracks that lead nowhere  
   *Williamson and Marsh*  
   55

8. Using communication and information technologies to empower women in rural communities  
   *Grace*  
   63

9. Working smarter not harder: Regional disability-based organisations  
   *Griggs*  
   71

10. Support networks and trust: How social capital facilitates learning outcomes for small businesses  
    *Kilpatrick and Bell*  
    81

11. Groups that learn and how they do it  
    *Kasl*  
    91

12. Spiritual impact statements: A key to sustainability  
    *Bradbery, Fletcher and Molloy*  
    101
PART THREE Best practice in learning for developing communities

13. Alternative models for community sustainability
   Moore, Hill and Brooks

14. A group action learning model for sustainable rural community development: Reflections on an Indonesian case
   Muktasam and Chamala

15. Enabling communities through the arts: Case studies from the Community Cultural Development Fund of the Australia Council
   Kingma

16. Community strategies: Addressing the challenges for young people living in rural Australia
   Wyn and Stokes

17. A regional approach to youth employment: The role of young people in renewing regional communities
   Mulraney and Turner

18. What does the business sector get out of investment in communities?
   Bowles

19. Learning, change and sustainability: Exploring the learning processes of pastoralist stakeholders in the tropical savannas
   Arnott and Benson

20. Learning partnerships in the workplace
    Balatti

21. Building social capital and community learning networks in community Internet access centres
    Bruce

22. Newspapers and health centres: Selected short stories of community development case studies
    MacManamey, Falk, Bruce and others

23. Enabling leadership: A new community leadership model
    Falk and Mulford

PART FOUR Conclusion

24. Learning to manage change in communities: A way forward
    Kingma and Falk
Preface

This book has been prepared according to standard academic book publishing procedures. The individual chapters were initially edited and screened, and were returned to the authors for amendment as required. At this stage, some chapters submitted were rejected.

After initial revisions, all chapters were sent to two independent and blind reviewers, one from the economics and social development field (Australia) and one from community and regional development (USA). Each of these reviewers commented on all chapters, their individual integrity and the overlaps and coherence of the assembled work. These comments were returned via the Editor for authorial amendment once again.

My thanks go to the independent reviewers for their time and trouble in helping shape this book into a coherent whole.
Acknowledgements

I am grateful to all those who assisted in various ways with the preparation and production of this book. Many people worked behind the scenes to coordinate the chapter contributors and the flow of paperwork associated with that process. Deborah Wagner coordinated the electronic formation of the chapters. Glenda Holloway worked hard from her rural retreat on the stages of unification of style and appearance. Susan Johns and Margaret Kreft edited the chapters to their final version guided by Bron Power. Carol Cheshire from NCVER guided the process to its fruition.

Particular thanks go to the independent reviewers from Australia and the USA, who spent many hours of time and expertise assisting the book reach its final form.
