

# Apprentices and trainees 2015

Annual

National Centre for Vocational Education Research

## Highlights

### In summary

- Overall commencements decreased by 10.1% from 2014 to 2015, with non-trade commencements down 17.9% and trade commencements up 0.3%.

### Training rates

- 2.3% of Australian workers were employed as an apprentice or trainee as at December 2015, compared with 2.7% in 2014.
- Within the trade occupations, 10.0% of workers were employed as an apprentice or trainee as at December 2015, compared with 10.9% in 2014.

### Duration of training

- 40.4% of trade apprentices and trainees completing at certificate III and above in 2015 finished their training in two years or less, compared with 45.7% in 2014.
- 89.5% of non-trade apprentices and trainees completing a certificate III level and above qualification in 2015 finished their training in two years or less, compared with 90.1% in 2014.

4 Apprentice and trainee commencements, non-trade occupations, by AQF level, 2005–15 (%)	10

## Introduction

This annual publication provides a summary of training activity in apprenticeships and traineeships in Australia, including information on training rates and duration of training. The figures in this publication are derived from the National Apprentice and Trainee Collection no.87 (March 2016 estimates), which is compiled under the Australian Vocational Education and Training Management Information Statistical Standard (AVETMISS) for Apprentice and Trainee Collection Specifications, Release 6.0, March 2008.

## Scope

An apprentice or trainee is a person who undertakes a contract of training with an employer and a training provider. This publication presents an analysis of the training activity undertaken by apprentices and trainees in Australia in the period from 2005 to 2015.

## More information

For additional information on apprentices and trainees, please refer to <http://www.ncver.edu.au/publications/2880.html>. This provides state and territory breakdowns of the data presented in this publication, including seasonally adjusted data. Supporting documentation, including pivot tables and the estimation methodology, is also available via this link.

In addition, a separate publication, *Completion and attrition rates for apprentices and trainees 2015*, has been produced, which presents completion and attrition rates for apprentices and trainees using three different methodologies:

- contract completion and attrition rates: based on the outcomes of contracts of training
- individual completion rates: based on contract completion rates and adjusted for factors representing average recommencements by occupation
- projected contract completion and attrition rates for the latest commencing apprentice and trainee cohorts: based on a 'life tables' methodology.

Further details on these methodologies and the resultant data tables can be found at <http://www.ncver.edu.au/publications/2881.html>.

Data represented in this publication are consistent with the *Australian vocational education and training statistics: apprentices and trainees 2015 – December quarter* publication, which was released on 16 June 2016. Please refer to <http://www.ncver.edu.au/publications/2863.html>.

## Australia in summary

The number of apprentices and trainees in-training as at 31 December 2015 was 278 600, a decrease of 11.8% from the previous year. *Table 1*

In 2015, compared with the previous year:

- Completions decreased by 24.0%, to 118 600. *Table 1*
- Cancellations and withdrawals decreased by 10.6%, to 98 200. *Table 1*
- Commencements decreased by 10.1%, to 171 200. Of this: *Table 1*
  - trade commencements increased by 0.3% *Table 4*
  - non-trade commencements decreased by 17.9%. *Table 5*

In 2015:

- Trade occupations accounted for 48.1% of all apprentice and trainee commencements. *Table 6*
- 48.2% of apprentices and trainees who commenced in trade occupations were aged 19 years and younger, compared with 39.6% in non-trade occupations. *Table 6*
- Commencements in trade apprenticeships and traineeships were almost exclusively at the certificate III qualification level (92.6%). *Figure 3*
- 67.6% of non-trade apprentices and trainees commenced their training at certificate III qualification level in 2015. *Figure 4*

### Training rates

The training rates present apprentices and trainees as a proportion of individuals employed.

As at 31 December 2015:

- 2.3% of Australian workers were employed as an apprentice or trainee. *Table 9*
- 10.0% of workers within the trade occupations were employed as an apprentice or trainee. *Table 10*
- 11.8% of teenage workers (aged 15 to 19 years) were employed as an apprentice or trainee. *Table 10*
- 67.4% of teenagers working in trade occupations were employed as an apprentice or trainee. *Table 11*

### Duration of training

Duration of training refers to the period of time apprentices and trainees take to complete a contract of training.

For apprentices and trainees completing training at certificate III and above in 2015:

- 40.4% of trade apprentices and trainees completed their training in two years or less, compared with 45.7% in 2014. *Table 15*
- 89.5% of non-trade apprentices and trainees completed their training in two years or less, compared with 90.1% in 2014. *Table 16*

## Terms

**Australian Qualifications Framework (AQF)** is a national framework of credentials that covers qualifications from certificate I through to a doctoral degree. For more details on the AQF, go to <<http://www.aqf.edu.au>>.

**Australian and New Zealand Standard Classification of Occupations (ANZSCO)** is a classification of the occupations of individuals. The classification is based on the Australian Bureau of Statistics, Australian and New Zealand Standard Classification of Occupations (ANZSCO First edition, revision 2, ABS cat.no.1220.0).

**Cancellations and withdrawals** refers to apprentices and trainees whose contract of training has been terminated prior to a successful completion. Cancellation and withdrawal figures may also include contracts which have been transferred due to a change in employer.

**Commencements** refers to apprentices and trainees starting a program of training. The date of commencement is the date that an apprentice or trainee's contract of training is registered or approved under the provisions of the relevant state/territory legislation.

**Completions** refers to apprenticeship or traineeship contracts of training for which all of the prescribed requirements have been met.

**Contract status** indicates the status of apprentice and trainee contracts of training, including the commencement, completion, cancellation/withdrawal of contracts, and apprentices and trainees 'in-training'.

**Existing workers** refers to those apprentices and trainees who were employed by their current employer for more than three months full-time (or 12 months part-time/casual) prior to commencing their training contract.

**Full-time apprentices or trainees** are those whose ordinary hours of employment, including the training component, are at least the usual hours of employment for a full-time employee in that occupation.

**Industry skills councils** are organisations representing particular industries. For more information on industry skills councils, go to <<http://www.isc.org.au>>. For more information on the training packages developed by industry skills councils, go to <<http://www.training.gov.au>>.

**In-training** refers to apprentices and trainees who are actively training under the terms of their training contract and who have not completed, cancelled, withdrawn or suspended their training, or whose training contract expired without their meeting all of the prescribed requirements of their program.

**Newly commencing workers** are those who are not existing workers (that is, apprentices and trainees who were not employed by their current employer prior to commencing their training contract).

**Non-trades** refers to those apprentices and trainees employed in occupations outside the trades. Non-trades include all occupations listed under the Australian and New Zealand Standard Classification of Occupations (ANZSCO First edition, revision 2), with the exception of major group 3 (Technicians and trades workers).

**Part-time apprentices or trainees** are defined as those whose ordinary hours of employment, including the training component, are less than full-time. Part-time provisions vary across Australia and across occupations, with 'part-time' defined by each state and territory.

**School-based** refers to those who commence an approved school-based apprenticeship or traineeship.

**Seasonal adjustment** refers to a mathematical model used in time series data to smooth out fluctuations attributable to seasonal influences.

**Trades** refers to those apprentices and trainees employed in trade occupations under major group 3 (Technicians and trades workers) of the Australian and New Zealand Standard Classification of Occupations (ANZSCO First edition, revision 2).

**Training duration** indicates the amount of time that an apprentice or trainee takes to complete their contract of training from time of commencement.

**Training packages** are a set of nationally endorsed standards, guidelines and qualifications for training and for recognising and assessing skills. For more details on training packages, go to <http://www.training.gov.au>.

**Training rates** are the number of apprentices and trainees in-training as a proportion of the number of individuals employed. In calculating training rates, both in-training and employment figures exclude those below 15 years of age. Employment data are collected by the Australian Bureau of Statistics. For more details on labour force statistics, go to <http://www.abs.gov.au>.

# Explanatory notes

## Data source

- 1 Information included in this publication is, unless stated otherwise, derived from the National Apprentice and Trainee Collection no.87, March 2016 estimates, which is compiled under the Australian Vocational Education and Training Management Information Statistical Standard (AVETMISS) for Apprentice and Trainee Collection Specifications, Release 6.0, March 2008.

## Estimation procedure

- 2 Figures on apprentice and trainee activity (such as commencements, completions and in-training) are based on the date of effect rather than the date of processing. Due to lags in processing, the most recent figures are estimated (for training activity from the June quarter 2014 to the December quarter 2015). The estimation method involves weighting recently processed numbers, based on average reporting lags. As estimates are revised for up to seven quarters, figures for the last two years may differ from those published in earlier or in subsequent reports. Figures in bold are actual numbers. Further details on the estimation methodology can be found at <http://www.ncver.edu.au/publications/2267.html>, while further information on the adjustment notes for recent collections can be found in the supporting documents at <http://www.ncver.edu.au/publications/2880.html>.

## Occupation (ANZSCO) group

- 3 This publication uses the Australian and New Zealand Standard Classification of Occupations (ANZSCO First edition, revision 2) for reporting. Occupation (ANZSCO First edition, revision 2) group data have only been collected in the AVETMIS Standard from the September quarter 2000. For reporting purposes, historical data dating back to the September quarter 1994 have been back-cast, based on current ANZSCO First edition, revision 2 usage, training package and Australian Standard Classification of Occupations (ASCO) data previously collected. Further detail regarding the methodology can be found at <http://www.ncver.edu.au/publications/2266.html>.

## Seasonal adjustments

- 4 Smoothed seasonally adjusted data are also presented in this publication. This involves the use of a mathematical model to smooth out fluctuations due to seasonal influences. Seasonally adjusted and smoothed data are useful to illustrate trends from one quarter to the next, but cannot be further disaggregated. Seasonally adjusted and smoothed data in this publication were derived using the Apprentice and Trainee Collection, no.87, March 2016 estimates. These data were adjusted using X-11-ARIMA methodology and were then 7-point Henderson-smoothed. The seasonally adjusted and smoothed data used in figures 1 and 2 are available in the data section at <http://www.ncver.edu.au/publications/2880.html>. Further details on seasonally adjusted and smoothed figures can be found at <http://www.ncver.edu.au/publications/2790.html>.

## Training rates

- 5 Trade employment (table 10) refers to those persons aged 15 years or over employed in a Technicians and trades workers occupation (ANZSCO First Edition, revision 2) group.
- 6 The total training rate for 15 to 19-year-olds in table 11 may differ from that presented in table 10 due to the employment data being sourced from the quarterly ABS publication rather than the monthly one. This is due to the fact that the number of employed persons by occupation is reported on a quarterly basis only.
- 7 Training rates are derived by calculating the number of apprentices and trainees (aged 15 years and over) in-training as at 31 December (NCVER data) as a percentage of employed persons (aged 15 years and over) as at December (ABS data). See ABS, *Labour force, Australia, detailed – electronic delivery*, April 2016, cat.no.6291.0.55.001; and ABS, *Labour force, Australia, detailed, quarterly, February 2016*,

cat.no.6291.0.55.003. The ABS does not produce monthly estimates of employment by occupation, with data available on a quarterly basis only (that is, February, May, August and November).

## Definitions and derivations

- 8 As the vocations approved to be under an apprenticeship or traineeship training contract are not consistent across all jurisdictions, NCVET has adopted a Trade/Non-trade categorisation for the purpose of the National Apprentices and Trainees Collection, with 'Trades' classified as all occupations listed under ANZSCO major group '3 - Technicians and trades workers' and 'Non-trades' classified as all other major occupations groups 1–2 and 4–8 (ANZSCO, First edition, Revision 2). ANZSCO has now been back-cast by NCVET to 1994 for reporting purposes.
- 9 Unknown data have not been reported, whereas the total includes all contracts, including those with unknown status. Hence, some figures may not sum to the total.
- 10 A dash (-) represents a true zero figure, with no contracts reported in these categories.
- 11 The number of apprentices and trainees in-training is shown as at 31 December, while the number of commencements, completions, cancellations and withdrawals is provided for the calendar year.

## Additional information

- 12 From 1 July 2012 the Australian Government discontinued the \$1500 standard employer commencement incentive payment and increased the standard completion incentive by \$500 to \$3000 for existing worker apprentices and trainees in non-National Skills Needs List occupations. The observed changes to commencements and completion levels need to be seen in the context of this policy change. Further details on incentive changes may be found in the 2012–13 Budget <[http://www.budget.gov.au/2012-13/content/bp2/html/bp2\\_expense-15.htm](http://www.budget.gov.au/2012-13/content/bp2/html/bp2_expense-15.htm)>.
- 13 In April 2012, the Victorian Department of Education and Early Childhood Development announced, through *Refocusing Vocational Training in Victoria* <<http://www.education.vic.gov.au/about/departments/pages/refocusvet.aspx>>, that it would refocus subsidy rates for VET courses to better target areas of greatest public benefit and future jobs growth. New fee and funding rates were effective from 1 July 2012 for all new course commencements. It is likely that changes in subsidy rates for some courses may have influenced employer decisions on whether to commence trainees in the first or second half of the year.
