Contract status was extracted from the National Apprentice and Trainee Collection at the time of sampling for the Apprentice and Trainee Experience and Destination Survey. Respondents were asked in Q1 of the survey what their status was at the time of being surveyed (qre_status). An additional variable, 'group' was derived, taking into consideration respondents' contract status at the time of selection (contract_status), AND their response to Question 1 (qre_status).

Contract_status refers to contract status as at Collection no. 99, March 2019 estimates.

For respondents' final status as published, please refer to the variable '**group**'.

Values

Name: earn_at_end_imputed **Label:** Income at end of apprenticeship/traineeship (Annual figure)

Notes

In order to ensure consistency when comparing between the 2008 and 2010 Apprentice and Trainee Destinations Surveys, the income groupings in 2010 were recoded to match the groupings assigned in 2008. In the 2010 Apprentice and Trainee Destinations Publication and web tables, salary information is presented using the income variables q11y_old and q29y_old, as these are consistent with the 2008 income groupings.

In 2019, income ranges were no longer provided to respondents. Respondents were asked to provide an actual figure and the frequency that pay is provided (per week/ month etc). The fieldwork contractor then calculated the annual earnings for each respondent using these two variables. Extreme values and true zero values were excluded.

The mean of the imputed income values are provided in the ATED 2019 publication.
